

D. योग चित्त वृत्ति निरोध

*"yogena chittasya padena vacham
malam sharirasya cha vaidyakena
yo'pakarottamam pravaram muninam
patanjalin pranjaliranato'smi"*

Definition of yoga according to Patanjali's Yoga Sutra.

I.2 Yoga citta vritti nirodha

"Yoga is the cessation of the automatic activity of the mind."

I.3 "Tadaa drashtuh svarupé avasthaanam"

"Then our Center, established in itself, is revealed."

tadā: then

draṣṭuḥ : seer, witness

svarūpé : in one's own form

avasthānam : the act of settling down

In this sutra, it is explained that the **Drashta** (the observer) will refocus on his true form, in the Purusa (**sat, cit, ananda**).

Sutras I.2 and I.3 thus **define the very essence of Yoga**. Otherwise, the observer will identify with the **Vrittis**. Like a diamond that reflects the color of the support on which it is set. Instead of remaining pure and transparent, it becomes tinted. Popular language speaks volumes: "seeing red", "having dark thoughts"...

"The cessation of your ego, awakes you to your True Soul"

I.4 "Vrittisarupyam itaratra"

"Otherwise, our Center is identified with the restlessness of the mind."

vritti: modification

sarūpyam : assimilation, identification

itaratra : otherwise

"Your thoughts flowing restlessly If you let, Misconfuse by your Ego, your Purusha can be" vn

The vrittis

We've seen that you have to stop vrittis in order to refocus on your soul. To stop them, we need to understand the nature of vrittis. This is explained in sutra I.5.

I.5 Vrittaya panchatayya klisha-aklishta

"There are five changes in the mind, painful or not."

vritti: change, agitation

pancha: five in number

klisha: painful

aklishta: not painful

First of all, we can define **2 categories** for vrittis.

Painful mental fluctuations (klishas) and **non-painful** changes (aklishtas).

The first step on the yogic path is to replace klishas with aklishta, and then to **get rid of** aklishta. Once the 2 categories of Vrittis have been removed, the yogi can then attain samadhi.

Are we in a state of samadhi when we sleep deeply?

"I suppose this monkey is in samadhi in his sleep..."
