

# D.W.B.A.P.L.S.L.M.P.B.: The Multiversal Pirate Bank (V2)

## White Paper: The Peaceful Transition to \$D.Worth

**By:** Manus AI (for Monkey and the Pirate Bank Crew) **Objective:** To ensure the peaceful and harmonious transition from the disgusting old currency to \$D.Worth, managing DTC assets according to the principles of Dharma and autonomy.

### 1. Philosophy: Finance in Service of Dharma (Aparigraha & Asteya)

The **D.W.B.A.P.L.S.L.M.P.B.** (D.W.B.Ace Picsou Luffy Shanks Sabo Loki-Morpheus Multiversal Pirate Bank) is the implementation of **Yama Aparigraha (Non-Possession)** and **Asteya (Non-Stealing)** in the financial domain. The bank is not a place of accumulation, but a mechanism for distribution and transition. Its sole purpose is to make money obsolete by replacing it with **Worth**.

**Mantra:** *We are not here for money, but for Worth. Money is just the dirty fuel we need to convert.*

### The Lore: The Founding Crew (The Council of D.)

The bank is led by a council of legends, each bringing unique expertise to ensure a smooth transition:

| Founding Member            | Role                           | Expertise                                                      | Dharma Squad                |
|----------------------------|--------------------------------|----------------------------------------------------------------|-----------------------------|
| Truth D.morpheus (Gorilla) | Protocol Architect             | Founder of D.Esentya, guarantor of the DTC protocol integrity. | Ahimsa (Non-Violence)       |
| Duck D. Scrooge            | Chief Economist (Retired)      | Asset management, history of currencies.                       | Aparigraha (Non-Possession) |
| Monkey D. Luffy            | Delegator (via Duck D. Donald) | Represents the unimportance of money.                          | Ahimsa (Non-Violence)       |
| D. Shanks                  | Binance Representative         | Expertise in centralized                                       | Satya (Truth)               |

|                |                                    |                                                            |                               |
|----------------|------------------------------------|------------------------------------------------------------|-------------------------------|
|                |                                    | exchanges (to be converted).                               |                               |
| <b>D. Sabo</b> | Apple Representative (UPPER Apple) | Technological innovation, UX/UI.                           | Brahmacharya (Energy Mastery) |
| <b>Loki</b>    | Vault Guardian (Human)             | Social networks (TikTok, Telegram), Asteya Representative. | Asteya (Non-Stealing)         |

## 2. Transition Architecture: The \$D.Worth Smart Contract

The bank operates on the DTC blockchain and uses a series of CosmWasm Smart Contracts to manage the conversion and distribution of \$D.Worth.

| Component                  | Role                                                                                                                                                        | Involved Smart Contract  |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>\$D.Worth Converter</b> | Manages the conversion of old currency (Fiat, external Crypto) into \$D.Worth. The rate is indexed to the <b>Value of Autonomy</b> (food, energy, housing). | Worth_Converter_Contract |
| <b>D.W.B. Vault</b>        | The DTC's decentralized vault. Managed by the RoleManager and protected by Loki's Truth ID , under the supervision of Truth D.morpheus.                     | DTC_Vault_Manager        |
| <b>Dharma Pulse Loan</b>   | Interest-free loans based on Karma (Dharma Pulse) and not on material collateral.                                                                           | Karma_Loan_Contract      |
| <b>Aparigraha Burn</b>     | Mechanism for the gradual destruction of old currency and unused \$D.Worth to prevent accumulation.                                                         | Non_Possession_Burner    |

## 3. The Pirate Bank's Cool-Groove Services

The D.W.B.A.P.L.S.L.M.P.B. is not a bank; it's a **Value Portal**.

1. **Peaceful Conversion:** Members can convert their external assets into \$D.Worth. The process is transparent, and the rate is fair because it is based on real value (a meal, an hour of free energy).
  2. **Karma-Based Loans:** The `Karma_Loan_Contract` allows DTC members to access resources (robots, tools) not based on their wealth, but on their **Karma** (measured by the Dharma Pulse). The higher your Karma, the more access you have to resources to serve the community.
  3. **Loki and Truth D.morpheus:** Loki, as the Asteya representative and social network expert, ensures communication and transparency. Truth D.morpheus guarantees that the bank's architecture remains aligned with the D.Esentya protocol, ensuring the integrity of the code.
- 

## 4. Integration with the DTC

- **D.Chronos Aion:** Provides timestamping for transactions and the calculation of negative interest (Aparigraha Burn).
- **D.FREE FOOD Cooperative:** The \$Nasi Goreng is the base asset that anchors the value of \$D.Worth.
- **D.SHAKTI POWER:** Karma loans can finance the acquisition of energy autonomy technologies.

**Conclusion:** The D.W.B.A.P.L.S.L.M.P.B. is the bank that ends banks. It is the bridge to a regenerative economy where value is service, not accumulation. With such a legendary crew, the transition to \$D.Worth will be not only peaceful but utterly *cool-groove*.
