

# English Detailed Synopsis : The Truth of the Globe: A DAO Experiment

**Estimated Total Duration:** ~1h30 to 2h30 (flexible for expansion)

## Scene 1: The DTC's Secret Laboratory (Introduction, The Earth Challenge)

- **Duration:** ~15-20 min
- **Summary:** The episode opens in a state-of-the-art underground laboratory of the Dream Truth Community (DTC), bathed in soft, futuristic light. Holographic screens display complex simulations of physical phenomena. **Monkey**, an eccentric scientist with disheveled hair and eyes sparkling with curiosity, is leaning over a giant model of a terrestrial globe. Beside him, **Morpheus**, calm and composed, observes with silent intensity. Monkey, with his characteristic laugh, "AHAHAHA!", announces the challenge: "We are finally going to unravel the mystery of the Earth! Round or... not round? AHAHAHA!" He explains that, despite centuries of "proof," the DAO has doubts and, with its unlimited resources, will recreate the Earth to scale to observe the phenomena themselves.

They begin by reproducing a globe that rotates around a "sun" (a powerful projector) and on its own axis. Ultra-sophisticated mechanical ants, controlled by DAO AIs via a neural interface, are released onto the surface. The initial findings are disconcerting: water does not stay on the globe; it slides off and accumulates at the poles. Attempts to recreate nature (waterfalls, forests, mountains) fail miserably, as the elements do not behave as expected. Monkey scratches his head, perplexed, while Morpheus meticulously notes each failure. The mechanical ants, when attempting to stand upright at the South Pole, inevitably fall, sliding across the surface. "Impossible!" exclaims Monkey, "Gravity... it's a joke! AHAHAHA!"

- **Key Elements:**
  - **Settings:** DTC's secret laboratory (futuristic, high-tech, holographic screens).
  - **Characters:** Monkey (eccentric, laughing, scientist), Morpheus (calm, observant, pragmatic), mechanical ants (miniature, sophisticated).
  - **Actions:** Monkey and Morpheus launch the experiment, observe the failures of water and nature on the globe, mechanical ants fall.
  - **Tone:** Scientific, humorous, mysterious, with a touch of defiance.
  - **Visuals:** Holographic simulations, giant globe model, mechanical ants moving and falling, water sliding off the surface.

## Scene 2: The Revelation of Magnetism and Density (The Egg and the Glass of Water)

- **Duration:** ~10-15 min
- **Summary:** Faced with the failures, Monkey has an epiphany. "What if it wasn't gravity? What if it was... magnetism! AHAHAHA!" Morpheus, intrigued, listens attentively. Monkey proposes a new hypothesis: the attraction downwards is due to magnetism and density, not an invisible force called gravity. To prove it, he performs a simple but visually striking experiment: that of the egg and the glass of water. He takes a glass of water, puts an egg in it, which sinks. Then, he adds salt to the water, and the egg floats. "You see!" exclaims Monkey, "Density! Not gravity! AHAHAHA!" He explains that objects "fall" because they are denser than their environment, and that the Earth's magnetism pulls them downwards.

Back in the laboratory, they apply this new theory to the miniature globe. A powerful magnetic field is generated, emanating from the globe. The mechanical ants, equipped with tiny magnets, now hold perfectly to the surface, even when they stand up. Water, under the influence of the magnetic field, stabilizes and forms oceans. Waterfalls and mountains can finally be recreated, with the elements behaving consistently. Monkey and Morpheus exchange a triumphant look. "The truth is here, Morphy!" exclaims Monkey, "Right under our noses! AHAHAHA!"

- **Key Elements:**
  - **Settings:** DTC laboratory, experiment table.
  - **Characters:** Monkey, Morpheus.
  - **Actions:** Monkey proposes the magnetism and density hypothesis, performs the egg experiment, applies the theory to the miniature globe, ants hold, water stabilizes.
  - **Tone:** Revealing, didactic, triumphant, with Monkey's enthusiasm.
  - **Visuals:** The egg and glass of water experiment (close-up), the magnetic field visualized around the globe, mechanical ants holding to the surface, water forming oceans.

## Scene 3: The Recreation of the Flat Earth (The Circular Antarctic, The Dome, The Cameras)

- **Duration:** ~20-25 min
- **Summary:** Empowered by their discoveries, the DAO decides to move to the next stage: recreating a miniature flat environment. They start with a country, reproducing every detail: sand, mountains, lakes, cities. Mechanical ants are sent to explore this environment, their cameras transmitting real-time images. The

results are stunningly realistic. Encouraged, they decide to recreate the entire Earth, but this time, in a flat form, with a circular Antarctic forming a huge ice wall all around. A giant dome is built over this flat model, simulating the atmosphere.

The mechanical ants, equipped with high-resolution cameras, are deployed on this miniature "Flat Earth." The images they transmit are astonishing: they show a sun and moon moving above the surface, creating day/night cycles and seasons, exactly as we observe them in reality. Stars revolve around a central point. The perspectives and horizons are identical to those we see from Earth. Monkey and Morpheus, surrounded by DAO members, watch the screens with palpable excitement. "That's it!" exclaims Monkey, "That's the truth! AHAHAHA!" The DAO is buzzing with activity; a multitude of common experiments are immediately launched to verify the extent of this discovery.

- **Key Elements:**

- **Settings:** DTC laboratory, miniature model of a flat country, then of the Flat Earth with the circular Antarctic and the dome.
- **Characters:** Monkey, Morpheus, DAO members, mechanical ants.
- **Actions:** The DAO recreates a flat country, then the Flat Earth, deploys mechanical ants, observes the transmitted images.
- **Tone:** Revealing, spectacular, triumphant, with a touch of scientific madness.
- **Visuals:** Detailed models, mechanical ants exploring, images transmitted by the ants' cameras (sun, moon, stars, horizons), the Antarctic ice wall, the dome.

#### **Scene 4: The Call to Truth and the Flying Lanterns (Conclusion)**

- **Duration:** ~10-15 min
- **Summary:** The news of the DAO's experiment spreads like wildfire. Monkey and Morpheus, before a huge crowd of DTC members and citizens from around the world, announce the results of their experiment. Monkey, with his usual charisma, proclaims: "The truth is here! The Earth... is not what you were told! AHAHAHA!" He explains the conclusions about magnetism and density, and presents the astonishing images of their miniature "Flat Earth." The crowd is ecstatic, a mix of astonishment, joy, and liberation.

In a breathtaking final scene, millions of flying lanterns are lit and rise into the night sky. Each lantern is equipped with a small camera that broadcasts live images of this global celebration of truth. On each lantern, a wish is inscribed, a hope for a more just and free world. The lanterns' cameras show emotional faces, tears of joy, smiles. The scene is a blend of visual beauty and pure emotion, symbolizing the

awakening of consciousness and the power of truth revealed by the DAO. Monkey and Morpheus, side by side, watch the lanterns drift away, a satisfied smile on their faces. "The journey has only just begun, Morphy!" says Monkey, "AHAHAHA!"

- **Key Elements:**

- **Settings:** Large DTC gathering, night sky.
- **Characters:** Monkey, Morpheus, huge crowd.
- **Actions:** Announcement of experiment results, lighting of flying lanterns, transmission of images by lantern cameras.
- **Tone:** Epic, emotional, unifying, inspiring, with a touch of magic and celebration.
- **Visuals:** Huge crowd, millions of flying lanterns rising into the sky, images transmitted by lantern cameras (emotional faces, inscribed wishes), atmosphere of celebration and hope.
