

HIGHWIND & FRANKY'S GARAGE: The Revolution of Free Transport

1. The HIGHWIND: The Ship of Freedom

The **HIGHWIND** is not just a ship; it's the flying headquarters of the **Dream Truth Community (DTC)**, a symbol of limitless exploration and peaceful protection. Inspired by the legendary airship from Final Fantasy VII, it is designed to travel the entire world, from the skies to the depths, with a single mission: **to visit, connect, and never destroy**.

1.1. Protection and Peaceful Armament

- **Awesome Defenses:** The HIGHWIND is equipped with state-of-the-art protection systems, based on the energy shield technology of **Dr. D. Vegapunk**. These defenses are designed to absorb, deflect, and neutralize any aggression without ever retaliating with lethal force.
- **Peaceful Armament:** Our arsenal is strictly non-lethal. It includes:
 - **Free Energy Cannons (D.Shakti):** Used for propulsion, creating force fields, or temporarily neutralizing enemy systems (disabling weapons, jamming communications).
 - **Sonic De-escalation Systems:** Based on Brook's research, capable of calming aggressive minds or disorienting attackers without causing permanent damage.

1.2. The Ship's Heart: D.Shakti Power Labs

Under the aegis of **Dr. D. Vegapunk**, the **D.Shakti Power Labs** is the energy engine of the HIGHWIND and the research center for free energy.

- **Free and Unlimited Energy:** The ultimate goal is to distribute clean and unlimited energy to all citizens of the world, breaking dependence on centralized and polluting energy systems.
- **Tartarian Propulsion:** The HIGHWIND uses advanced propulsion inspired by Tartarian technologies (Zeppelins, single-wheel vehicles), ensuring maximum efficiency and minimal ecological footprint.

2. Franky's Garage: The Decentralized Development Center

The **Super Franky's Garage** is the nerve center of the transport revolution. It is a decentralized space, led by the former shipwright-banker **Franky D.B.**, dedicated to the development, construction, and learning of all means of locomotion.

2.1. Philosophy of Transport for All

- **Learning to Tinker:** The Garage is an open school where every member can learn to build, repair, and modify any vehicle (flying, submarine, terrestrial, marine).
- **Tartarian Research:** Research focuses on the return of forgotten technologies:
 - **Zeppelins:** Reproduction and improvement of airships for peaceful mass transport.
 - **Single-Wheel Vehicles:** Development of ultra-efficient and fun personal transport means.
 - **Robots:** Franky finds robots **SUUUUUPEER!** The Garage is a hub for personal and assistance robotics, always in a spirit of freedom and creativity.

2.2. The Jedi/Sith Holocron: The Knowledge of Transport

To guide ethical research, the Garage uses the **Jedi/Sith Holocron**:

- **Sith Vault:** A database listing all polluting, destructive, or centralizing technologies (the "Sith Vaut"). The goal is to understand these technologies never to reproduce them.
- **Jedi Archives:** The repository of free, sustainable, and decentralized technologies (Tartarian, D.Shakti, etc.).

3. The Transport Economy: DT Turismo and the Ferrai

The Garage is linked to the DTC economy through gaming and reward.

- **DT Turismo:** A driving and vehicle construction simulation game on the **Dreamstation** (the DTC's home automation game console). Players earn blueprints, materials, and skills.
- **Earning Your Ferrai:** Eventually, every member who excels in DT Turismo and learning at the Garage will be able to build their own **Ferrai** (their personal vehicle) for total transport autonomy.
